ABSTRACT:

Techniques for modifying a toner cartridge intended to operate with a first type of imaging device to operate in a second type of imaging device. The toner cartridge includes a drum shutter connected to a waste bin, with the drum shutter including first and second shutter arms. A method of modifying the toner cartridge intended for operation in the first type of imaging device to operate in a second type of imaging device includes removing a portion of the first shutter arm. In another aspect, the method includes removing a portion of the waste bin adjacent to the first shutter arm. In another aspect, the method includes removing a second portion of the waste bin to form a hole in the waste bin and attaching a chip mounting patch to the waste bin to fill the hole. A computer chip may be attached to the chip mounting patch.

[0001] The present application is a continuation-in-part (CIP) of U.S. patent application Ser. No. 10/319,088 entitled "Method and Apparatus For Converting Toner Cartridges to Fit Various Types of Printing Machines" filed on Dec. 14, 2002 and incorporated by reference herein in its entirety.
